NeuroScience – Labs Test Instructions
Urine and/or Saliva

Your test may or may not require a saliva sample; *all kits require a urine sample*. There is a sticker on the side of your box and also instructions inside the kit that will let you know what is required.

I have included a separate sheet that has instructions on how to collect urine and/or saliva in the first two paragraphs. There are also instructions inside the test kit.

This test may or may not be covered by your insurance – for that information call your insurance company and find out. CorePsych **will not** do pre-authorizations with your insurance company for any testing. If you decide to call your insurance to see if this could be covered, they may ask for the following information:
CPT/Procedure codes: These codes are listed on the bottom right hand corner of the requisition form inside the test kit.

There are two prices that correlate with each test: **Pre-Pay (PP)** and **List Price (LP)**. *Pre-pay* is when Pharmasan Labs receives full payment with your sample. *List Price* is when you include your insurance information and that is the amount that is billed to your insurance. If Pharmasan Labs bills your insurance and finds that your insurance does not pay, you are then responsible for the List Price for that test.

The cost of your test differs depending on which test you have been given:
NeuroScreen Basic (urine) – PP: $191.00; LP: $226.00
NeuroScreen Expanded (urine) – PP: $250; LP: $277.00
NeuroAdrenal Expanded (urine/saliva) – PP: $343.00; LP: $457.00
NeuroEndocrine Comprehensive (urine/saliva) – PP: $459.00; LP: $ 646.00
The sticker on the side of your box will also have the name of your test.

Please do not hesitate to call Desiree with CorePsych at 757.671.1776 should you have any questions.
