WHY TEST - TREATMENT FAILURE | COMPLETE DIAGNOSIS

Treatment failure, assuming reasonable treatment participation, *always means we're missing specific biological details*. To approach human suffering *only* from the perspective of treatment options based only upon DSM-5 behavioral appearances too often misses many biomedical points. Mind problems that don't respond well to medication treatments strongly encourage more biomedical, more fundamental testing – better data to *exactly* measure brain and body challenges. At *CorePsych* we use several different diagnostic tools/labs to assess any possible associated biomedical pathology that may interfere with traditional medical interventions. These useful laboratory tests are all approved by [FDA](#) & [CLIA](#) Laboratory certifications in these two links.

Testing reveals underlying medical complexity, often on a molecular level - while not testing defaults treatment to a process of perpetual speculation. Guesswork is out. Data is in. At *CorePsych* our mission is simple: to improve both your diagnostic and treatment process with the reality of biomedical numbers.

MUTUAL EXPECTATIONS

We fully expect additional testing to provide additional answers, or we wouldn't suggest them. Nothing is perfect, certainly not with medical complexity, and as a further means to encourage your search we *don't upsell any testing* in our *CorePsych* offices. Our team earns a living by interpretation and interventions based upon your testing results. Supplements in our office are optional. If they are indicated you can purchase them from our office or the company of your choice - or even choose to disregard these data points. You may request your data without our interpretation - that's also not a problem. We're here to help any way we can.

Problems that modify brain function, neurologic activity, epigenetic change, immunity, skin, respiratory, gut and hormones - including adrenal, sex hormones thyroid and environmental toxins– often respond to more advanced intervention strategies – about 70% of the time within several weeks, 90% of the time if given more time.

For depression, anxiety, mood disorders, ADHD, developmental delays, Asperger's or Autism Spectrum, or any puzzling, chronic psychiatric condition these testing options provide additional insights for your underlying biomedical mind process. For an interesting interview with an internationally acclaimed testing expert go to this page at CoreBrain Journal [CBJ]: <http://corebrainjournal.com/025>

HOW DETAILS: For any *CorePsych* Inquiries, <http://corepsych.com/begin>
To Schedule An Appointment - Patient Care: <http://corepsych.com/appointments>

INSURANCE REIMBURSEMENT – ASK YOUR INSURER TO CONFIRM
Asterisks: Often-Covered Codes - *BC-BS, **Champus/Tricare, ***Medicare

For **IgG** Immunoglobulin G Food Sensitivities at *Great Plains*: */**/**

Blood. Best to start here: Why: <http://corebrainjournal.com/005> Dr. Osborne

- Great Plains Labs Test: gluten, casein, eggs, yeast/candida \$219
http://www.greatplainslaboratory.com/home/eng/food_allergy_igg.asp
- Video Explanations Connect IgG/IgE, immunity measures, treatment failure:
<http://corepsych.com/mind-body-meds>

For **Walsh Protocols** Trace Elements and Pyrroles: *Direct Health Care Metabolic Panel* - \$120 */**/** and 296\$ if out of pocket. *Blood and Urine*.

- Direct Link: <http://corebrainjournal.com/dha>
- Videos & instructive posts by Dr. William Walsh: All three Episodes
<http://corebrainjournal.com/115> - also /137, /042 and /141 [Autism]

For **OATS** we use *Great Plains Laboratory* - \$299 */**/** *Urine*.

- Video on Detailed Measurement with OATS: Organic Acid Testing:
<http://vimeo.com/41993293> | <http://corebrainjournal.com/140>

For **TMA** [Tissue Mineral/Metals Analysis] *Trace Elements Labs: Hair*:
References for the value of TMA: - \$51

- On why: Dr. Malter: <http://corebrainjournal.com/026>
- <http://www.traceelements.com/EducationalResources/HTMA.aspx>

For **Genetic Testing**: MTHFR, CYP450, et al: <http://corepsych.com/gt> *Mouth swab*

For **Neurotransmitters** [Neurotransmitter/NT References]: **~ 200\$ *Urine*

- Multiple References in PDF: <http://corepsych.com/neurotransmitters-urine>
- Urinary NT Testing *Labrix Labs*: <http://corepsych.com/nt-testing>

For **Hormones**: *Labrix Clinical – Saliva*

- Multiple references and examples: ~ Prices vary by test recommendations.
