Charles Parker DO  
Medical Director  
Cell 757.560.5625

**To:** Whom It May Concern:

**From:** Charles Parker, DO, Child, Adolescent and Adult Psych, Addictions Specialist, Psychopharmacologist, Brain Nuclear Imaging Resource [SPECT], Metabolic/Systems Medicine Specialist.

**RE:** Patient: \_\_\_\_\_

**Subject:** Your “Doctor of Record” and the patient’s ongoing consultation with Parker

**Date:** \_\_\_\_\_

Your patient plans to consult with me. It would be most helpful if your patient could consult with me in the context of your ongoing care there. Therefore, I am requesting that we work together to facilitate his/her care.

This brief note is to request that you serve *there* as the Doctor of Record, and monitor our recommended care with the patient in your office. If it makes sense, I would be happy to remain in a consultant role, discuss the detailed nuances of treatment with the patient and the family, and with you, as your need arises. I would appreciate any faxes or mailings from you as well to keep posted on your views of progress or regression.

Subsequent to each review with me, *I hardcopy by fax every recommended change in meds* and give reasons, and ask that you manage the meds there. I don’t send scripts through the mail, and do not medically manage people that I don’t see regularly in my office, even if they are from VA. My recommendations are very traditional, within the standard of care.

For *urgent* matters I always take calls from any Doctor of Record to my office here, anytime.

For more challenging psychiatric *acuity* states [psychosis, life or death matters]:  
- we do not try to provide ongoing consultation for psychiatric acuity long distance - too many liabilities, too many unpredictable variables. We try to predict these eventualities and transition if this arrangement proves counterproductive, and inform the patient of this plan at the outset. We will facilitate transfer for those cases quickly with availability for consultation in that process as well.

Patients will be expected to *authorize our medical communication* through our intake process at this office.

Thanks; look forward to working together,

CEP
